Siddiq P Software Development Engineer | Backend & Systems

sunnyvk799@gmail.com | +91 9059295627 | linkedin.com/in/siddiq-p | github.com/sunnyvk799-pixel

Professional Summary

Software developer with strong foundations in Data Structures & Algorithms, Operating Systems, DBMS, and Computer Networks. Hands-on experience building backend and full-stack applications using Python, FastAPI, React, and SQL databases. Built and deployed a real-time chat application featuring authenticated WebSockets, PostgreSQL persistence, Redis Pub/Sub, and automated CI testing. Familiar with Docker, Linux, Nginx, REST APIs, and distributed systems fundamentals.

Education

BTech in Electronics and Communication Engineering, *Indian Institute Of Information Technology Dharwad* 2022 – 2026
Dharwad, Karnataka

Technical Skills

Programming Languages
Python, C++, JavaScript, TypeScript, SQL

Systems & Infrastructure
Linux, Docker, Docker Compose, Nginx, Load Balancing, Distributed Systems Fundamentals, Microservices

Core Computer Science
Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Tools & Testing
Git, GitHub, GitHub Actions, Pytest

Backend & APIs
FastAPI, Flask, REST APIs, WebSockets, Asynchronous Programming, SQLAlchemy, Alembic

Frontend
React, HTML, CSS, Jinja, Chart.js

Databases & Messaging
PostgreSQL, MySQL, SQLite, Redis, ChromaDB

AI / Machine Learning
Pandas, Scikit-learn, Machine Learning, NLP, Generative AI, LLMs, RAG, LangChain, Sentence Transformers, Vector Embeddings, Semantic Search

Certifications

Applied AI and Data Intelligence
IIT Patna

Data Structures & Algorithms and LeetCode for Coding Interviews
Scott Barrett, Udemy

Certifications as AI Workshop
Be10X

Achievements

Solved 250+ Data Structures and Algorithms problems on LeetCode, GeeksforGeeks and similar platforms.

Projects

Real-Time Chat Application , *FastAPI, React, TypeScript, PostgreSQL, WebSockets, Redis, Nginx, Pytest* 10/2026

- Built and deployed a full-stack real-time messaging application using FastAPI, React, TypeScript, and authenticated WebSockets.
- Implemented JWT authentication, Argon2id password hashing, and persistent message storage using PostgreSQL and SQLAlchemy.
- Integrated Redis Pub/Sub for message-event distribution and configured Nginx for load balancing across multiple FastAPI instances.
- Implemented online/offline presence, sent/delivered/read receipts, and message persistence across sessions.
- Containerized the application with Docker Compose, configured GitHub Actions CI, and deployed the frontend and backend on Render with Neon PostgreSQL and Upstash Redis.

LLM-Powered RAG Document Assistant , *Python, FastAPI, LangChain, ChromaDB, Gemini* 07/2026

- Built a document question-answering application using Retrieval-Augmented Generation (RAG) to generate context-aware responses from retrieved document content.
- Implemented document processing, text chunking, embedding generation, and semantic retrieval using Sentence Transformers and ChromaDB.
- Developed modular FastAPI endpoints for document ingestion and retrieval, separating API, retrieval, and vector-store components.

Smart Agriculture Assistant , *Flask, Python, REST APIs, Machine Learning, Pandas, JavaScript* 04/2026

- Developed a Flask-based web application integrating OpenWeather API forecasts to support weather monitoring and irrigation recommendations.
- Implemented weather-data processing and ML-based irrigation recommendations using Pandas and scikit-learn.
- Built interactive weather visualizations using Jinja templates and Chart.js to present forecast data and recommendations.
